THE ULTIMATE  
SURFACE EXPERIENCE

FieldTurf is a member of the FIFA Preferred Producer program.

### World-Class Performance

Vertex RGF systems have the highest level of certifications for football and rugby at both the amateur and elite levels.

### The Finest Playing Conditions

The unique combination of fibres in each stitch provides reduced splash, improved infill encapsulation and optimal ball roll.

### Stunning Field Aesthetics

The combination of 3 colours - sports green, field green and olive green - delivers that natural beauty to your field.

FieldTurf is a member of the IRB Preferred Producer program.

# Two fibres. One balanced system.

The genius of Vertex RGF lies in its combination of 2 state of the art yarns. It features 6 FieldTurf Optimum fibres, tufted together with 1 slit-film fibre, to create a turf system that combines the best properties of each.

#### Resilience:

A unique polymer delivers a fibre that keeps standing to deliver continued high performance over time.

#### Structure:

The structure of the slit-film fibre selected for Vertex RGF makes it very long-lasting.

#### Resistance:

The design of the Optimum fibre makes it one of the best fibres available in the industry.

#### Durability:

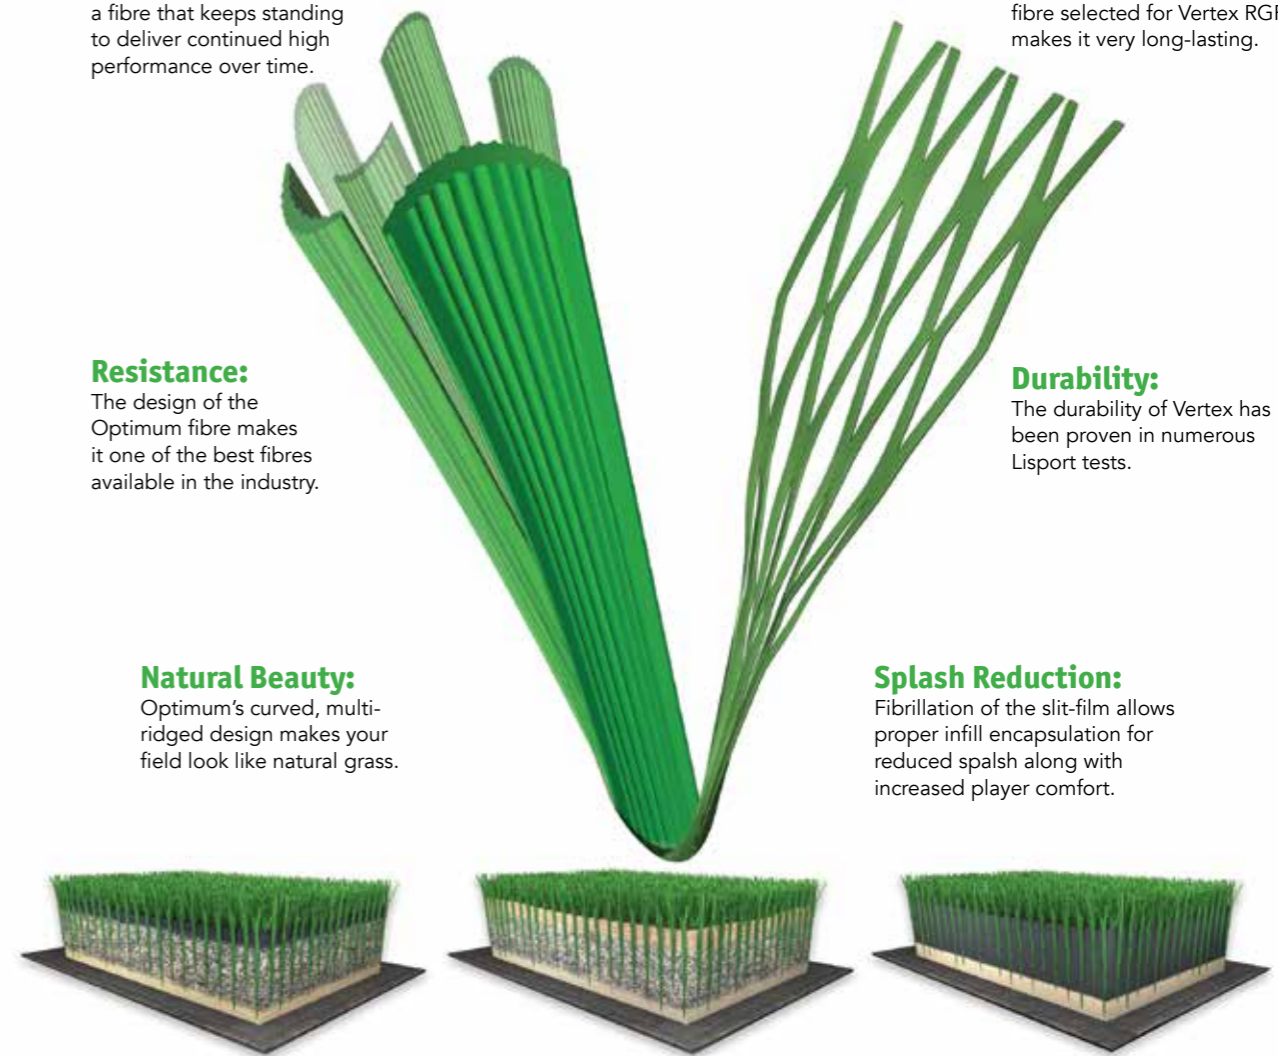

The durability of Vertex has been proven in numerous Lisport tests.

#### Natural Beauty:

Optimum's curved, multi-ridged design makes your field look like natural grass.

#### Splash Reduction:

Fibrillation of the slit-film allows proper infill encapsulation for reduced splash along with increased player comfort.

VERTEX RGF CHARACTERISTICS
17,500 Dtex per stitch
